Procurement of Interactive White Board TV, All-in-One PC, and Audio Devices Display Equipment for WaSH MIS Dashboard

Subject: Response to bidder's Clarification Requests on the Bidding Document

We acknowledge receipt of your letters dated September 01 and September 04, 2025, requesting clarification regarding the above-mentioned tender. Please find below our consolidated responses:

No.	Bidder's Question / Issue	Purchaser's Clarification
1	Duplication of Item No. 8 & 18 (24-port PoE Switch) and Item No. 9 & 19 (Management Server).	The repetition is intentional . These represent separate quantities required. Bidders must quote for each line item as listed.
2	All-in-One PC model (HP Envy 34-c1075t) may be discontinued.	Specifications are minimum requirements . Equivalent or superior models (HP or other international brands) are acceptable, provided they meet or exceed the requirements.
3	Request for construction drawings to understand project scope.	This is an ICT and AV equipment procurement (supply, delivery, installation). No civil works are involved; no additional drawings available.
4	Clarification on number/size of meeting rooms.	The equipment is intended for two (2) meeting rooms . Exact room dimensions are not relevant.
5	Management server quantity (8 units) seems excessive.	Quantity is correct and required to ensure redundancy, load distribution, and future expansion.
6	Why 5 All-in-One Computers?	The requirement of five (5) is intentional for meeting control, system management, data entry, and admin support.
7	"Multi-Media Wireless Touch Screen Unit" seems misnamed (appears to be a microphone).	The description is correct . It refers to a conference microphone with integrated touch screen functionality .
8	Possible duplication: 17 microphones and 21 touch screen units.	No duplication. 17 units = delegate microphones (no touch screen). 21 units = multimedia delegate units (with touch screen). Both are required.
9	VGA interface required for 98-inch displays, but most models now only have HDMI.	HDMI is acceptable as an alternative to VGA.
10	"EXTEND mode" for 24-port PoE switch is non-standard.	Bidders may ignore EXTEND mode . Compliance with IEEE 802.3 PoE standards is sufficient.

No.	Bidder's Question / Issue	Purchaser's Clarification
11	Question: The document states: "Training is required for 10-15 technical administrators for three to five days. It further mentions: The bidder shall arrange days factory level training for 6 persons. "However, the number of days required for the factory-level training is not specified. Could you please confirm the exact duration of the factory-level training for 6 persons?	Factory-level training is not required under this procurement package. Instead, targeted training is to be provided for a group of 10 to 15 technical administrators, focusing on operational functionality, system integration, and routine maintenance of the procured equipment.

Site Visit

To assist bidders in understanding the installation environment, a site visit is scheduled as follows:

Date: September 12, 2025

Time: 10:00 AM (local time)

Venue: Ministry of Water and Energy, Haile Gebresilasie Street, Addis Ababa

Attendance is recommended but not mandatory. Bidders are responsible for their own travel and accommodation.

We trust these clarifications will assist you in preparing a responsive and compliant bid. These clarifications form an integral part of the bidding document.

With Best Regards

Ambassador Asfaw Dingamo
